

EDUCATION

BSc Computer Science

Sep 2024 — May 2027 (expected)

Coventry University Wrocław — Wrocław, Poland

- 3rd (final) year. Relevant coursework: algorithms & data structures, software engineering, databases, operating systems.

EXPERIENCE

Cassini Hackathon 2026 BACKEND DEVELOPER

Apr 24 – 26, 2026

WaterShield · Wrocław, Poland · [github.com/borAn77/Watershield---HACKATHON-2026](#)

- Sole backend developer: designed and built the whole server side with **FastAPI (Python)** in a 48-hour sprint.
- Built a data pipeline that uses **Sentinel-2 satellite imagery** to monitor EU river water quality.
- Added **AI anomaly detection** to find pollution patterns and trigger risk alerts.
- Designed the **Supabase/PostgreSQL** schema for time-series data, served REST APIs to the frontend team, and built an **EU Water Framework Directive** compliance report module.

PROJECTS

WhyTired

HackYeah 2026 (Sport & Healthcare) · team of 2

Python · FastAPI · React · TypeScript · Tailwind · Render

Health and training assistant for students who train often and feel tired without knowing why. A daily check-in gives a hard, easy or rest recommendation. "Detective mode" ranks likely causes from the user's own data with confidence levels, then suggests a 7-day experiment and prepares a one-page summary in Polish for the family doctor. I built the backend rule engine, frontend and deployment.

[github.com/borAn77/WhyTired](#) · [Live demo](#)

Randezy

Booking platform for salons and barbers

React Native (Expo) · TypeScript · Next.js · FastAPI · Supabase · Stripe

Web app for customers and business owners, plus an iOS/Android business app built with Expo (calendar, finance reports, campaigns, staff login, push notifications, Sign in with Apple). Both share one Supabase PostgreSQL database with Row Level Security, and a FastAPI backend handles appointments and notifications.

[github.com/borAn77/randezy](#)

Macro Tracker iOS

TypeScript · Expo · React Native · GPT-4o

iOS calorie and macro tracker. GPT-4o vision reads a photo of a meal and returns its nutritional values in real time.

[github.com/borAn77/macro-tracker-ios](#)

AI Lead Generator

Python · FastAPI · OpenAI API

B2B lead generation system that finds businesses, verifies their emails and produces leads ready for outreach.
